Brooks Healthcare Solutions Fee Negotiation Services

Out-of-Network Surgery Claims

Brooks Healthcare Solutions (BHS) has deep and broad relationships with hundreds of outpatient surgery centers across the country. Those relationships are usually with the top executives of the ASC management companies as well as the business office managers and administrators directly at the centers. This gives us unparalleled access to the decision-makers who can agree to a significant reduction on an out-of-network claim, more so than the billing and collections staff can usually agree to. Therefore, contact Brooks Healthcare Solutions with your out-of-network claims and let us negotiate a fair reimbursement for each claim.

- Send BHS your important and larger out-of-network claims. Claims should be unpaid, with a majority of the claim's liability remaining with the plan sponsor.
- Be sure that you are able to tell BHS how quickly you are able to pay the claim once an agreement is reached. The sooner you can pay it, the better the savings can be on the claim.
- BHS needs to know the patient name, data of service, procedures and the appropriate codes, billed charges, plan liability & member liability, facility name and contact information, any payments that may have already been made, and any other relevant information that we might need.
- Email the information to BBrooks@BrooksHealthSolutions.com, and also tell us if the claim is above stop-loss thresholds or not.
- We can usually have a response and proposal within 24 hours, and then we will secure the signed agreement from the provider.
- We can even review large in-network claims to see if a quick-pay negotiation can be achieved in lieu of or in addition to the PPO discount.
